POWER-WRIST

From the people who introduced the original Powertilt over 25 years ago (and the first tiltrotators in 2002); comes the new range of tilting couplers. Incorporating a new low profile design, Exac-1 introduce their new Power-Wrist with integrated coupler to pick up standard or dedicated bucket types. Power-Wrist can be incorporated in other devices for drift-free positioning, from a post-driver to a tree shear.

- Reduced weight & build height - for better stability and decreased fuel consumption.
- Improved holding force - for increased productivity.
- Hardened seal & bearing surfaces - longer life and reduced ownership costs.
- Improved hose routing to the upper & lower sides.
- No exposed moving parts - reduced risk of damage.
- Versatile coupler configurations - manual or hydraulic to meet your requirements, standard pin type and dedicated systems.
- Two year warranty.
